

Command Mobile

INTRODUCING THE *COMPLETE SOLUTION* FOR MANAGING YOUR MOBILE ENTERPRISE.

Introducing Command Mobile: a powerful solution for managing your mobile enterprise. Developed by Tracen Technologies, a mobile solutions innovator, Command Mobile was designed specifically to fill a growing need in the mobile enterprise market. Clearly, mobile technologies and field data collection can provide an enormous return on investment, yet logistics and cost often prevent firms from implementing a mobile solution. Command Mobile was designed with this in mind, and enables all companies, including small to medium sized firms, to take advantage of the increased efficiency and productivity that large corporations have come to enjoy at a fraction of the cost.

Command Mobile is a mobile device management and inventory tracking system that allows user authentication, application management, and device inventory to be managed from a single web-based administrative interface. This cutting-edge system is built on a Dynamic Form Engine that enables companies to easily build and maintain their own forms, surveys, or inspections.

MANAGING YOUR MOBILE REQUIREMENTS JUST GOT EASIER. CHOOSE *COMMAND MOBILE* FROM TRACEN TECHNOLOGIES.

Implementing a comprehensive mobile solution has never been easier. With Command Mobile from Tracen Technologies, you can access powerful mobile capabilities that will enable you to increase efficiency, productivity, and profitability. From inventory tracking to field service dispatching and data collection, Command Mobile is the complete mobile solution you've been looking for.
