

SOAR Real-time Reporting of Student Progress & Outcomes
The power of SOAR is threefold:

Automated collection of education data from disparate sources

On-demand reporting

Longitudinal and disaggregated analysis of the areas that matter most to student success.

The vision of SOAR is to ensure that every child's progress is known by educators who have the necessary information to tailor appropriate and effective responses to support individual student success.

Solution for Educators & Parents

Today's schools are data-rich, but information-poor. Most school systems do not have the resources to effectively manage and analyze the volumes of data available to schools.

The SOAR SOLUTION:

SOAR is a web-based education data warehousing and reporting system that allows schools to use the information they already have at hand in a more meaningful and effective way to enhance student outcomes.

FEATURES

- 1) ability to disaggregate student data
- 2) ability to provide reports of student progress across school years
- 3) ability to bring together disparate data sources and produce integrated reports

USERS

Teachers: View individual and aggregate student data for your classroom

School Administrators View aggregate and disaggregate data for your school

District Administrators: View aggregate and disaggregate student data for individual schools as well as across your school district.

Instructional Coaches: View student data by teacher to help determine where additional training might be beneficial

Parents: View reports on your child's progress via secure log-in.

SOAR reporting

SOAR delivers real-time reports in the following areas:

- ✓ **Student Attendance**
- ✓ **Suspensions**
- ✓ **Test Scores**
- ✓ **Academic and Behavior Profiles**
- ✓ **Progress Towards Graduation**
- ✓ **Postsecondary Enrollment**

Developed in partnership with the **Institute for Research and Reform in Education (IRRE)**, SOAR evaluates indicators proven to be highly predictive of student outcomes.

SOAR System Benefits

- ✓ Captures the trends and patterns in the factors most relevant to student outcomes
- ✓ Supports import and transformation of state testing
- ✓ Predefined performance thresholds based on research based targets
- ✓ Integrates with existing student information databases
- ✓ Pre-designed reports that directly align to NCLB indicators
- ✓ Customizable thresholds to continue to raise the bar as student performance targets are met
